ABOUT SERT

SERT Occupational Safety Consultancy LLC is a third-party certification company based in the UAE. We provide a diverse range of occupational safety, health, and environmental services to core industry sectors through our expert team of engineers and consultants. With extensive experience in the industry, we understand our customers' needs and are dedicated to delivering expert, value-added services. Our mission is to continuously provide focused, innovative solutions to our clients.

Approvals & Certifications

We are a UAE-based Occupational Safety Consultancy specializing in inspection, testing, and certification services for lifting equipment, pressure vessels, and workplace safety systems. Our operations are structured to align with the regulatory frameworks of the UAE Ministry of Economy, Dubai Municipality, and the Ministry of Human Resources and Emiratization, and we are actively progressing through formal approval pathways with these authorities.

Our systems and procedures are designed in accordance with international standards and codes, including ISO, British Standards, and LEEA guidelines. We maintain readiness to operate within key industrial zones such as JAFZA, RAKEZ, and Dubai South, and our protocols are developed to meet EHS and third-party inspection body criteria.

As part of our commitment to quality and compliance, we are preparing for accreditation under EIAC (Emirates International Accreditation Centre) for inspection activities in accordance with ISO/IEC 17020. All inspection, testing, and certification services are conducted with full traceability and adherence to international procedures and specifications, ensuring safety, reliability, and audit-readiness across all components and equipment categories.

OUR SERVICES

We provide expert Inspection, Testing, and Certification services to ensure safety and compliance in various industries. Our services are categorized

Inspection, Testing & Certification

We conduct thorough inspection, testing, and certification for a wide range of equipment in compliance with international standards and codes.

Cranes & Lifting Equipment

We inspect, test, and certify all types of cranes, derricks, and gantries using load cells, water bags, or test weights. This also includes cargo loose gear attachments like wire rope slings, shackles, and hook blocks etc.

Marine & Offshore

Our services extend to lifeboat/rescue boat davits, deck mounted cranes using water bags and performing bollard pull tests. We also conduct inspection and certification of marine mooring systems, including anchors, anchor chains, bollards, and associated gear..

Industrial Equipment

We deliver inspection and certification services for material handling and pressure systems, including forklifts, mobile cranes, industrial boilers, and pressure vessels, in accordance with international safety and compliance standards.

Exclusive & Advanced Services

In addition to our core services, we offer specialized solutions tailored to our clients' unique needs.

Non-Destructive Testing (NDT)

We offer comprehensive non-destructive testing (NDT) services, including Dye Penetrant (DP), Magnetic Particle Inspection (MPI), and Ultrasonic Thickness Gauging (UT), along with advanced NDT techniques tailored to client-specific requirements and industry standards.

On-Site Spooling

We operate mobile spooling equipment capable of on-site wire rope handling and transfer from marine vessels, ensuring efficient and controlled deployment for offshore and port operations.

Pull testing & Structural Anchorage Verification

We offer portable pull testing solutions for verifying the integrity of pad eyes, lifting points, and anchoring fixtures across vessel structures—including decks, bulkheads, and overhead surfaces. Our services ensure compliance with load-bearing and safety requirements for marine and industrial applications.
